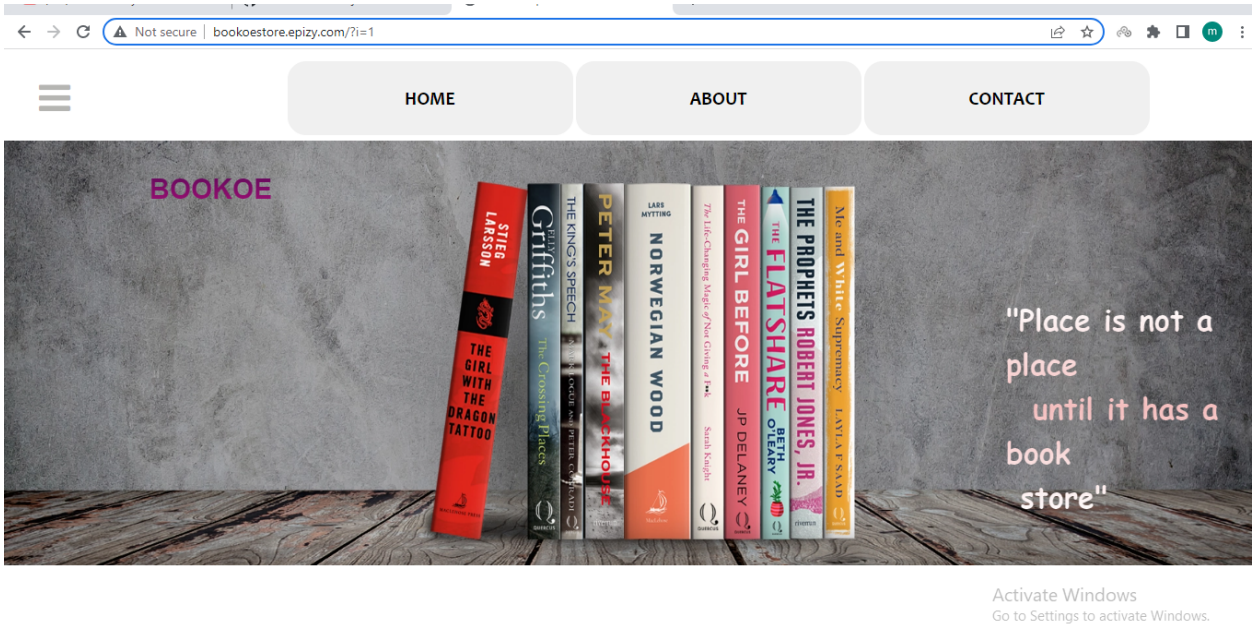
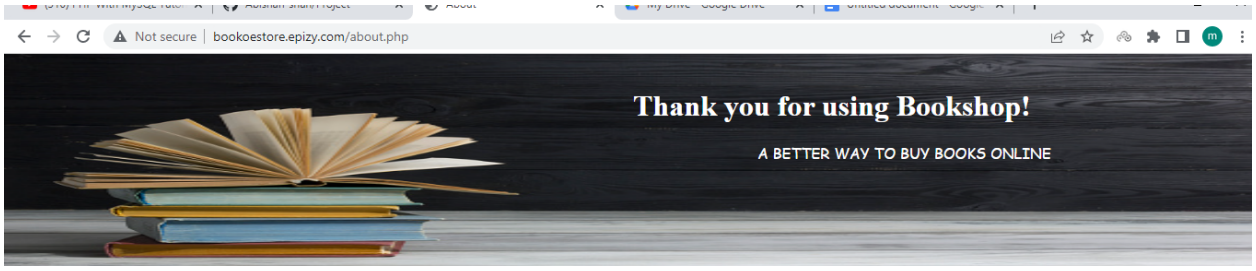
Description about online book store



This is the first view of the online book store web page.mainly there are three option buttons and a menu bar user can select about as option to see the vision and mission and contact for interact with developer or owner by giving user ideas.

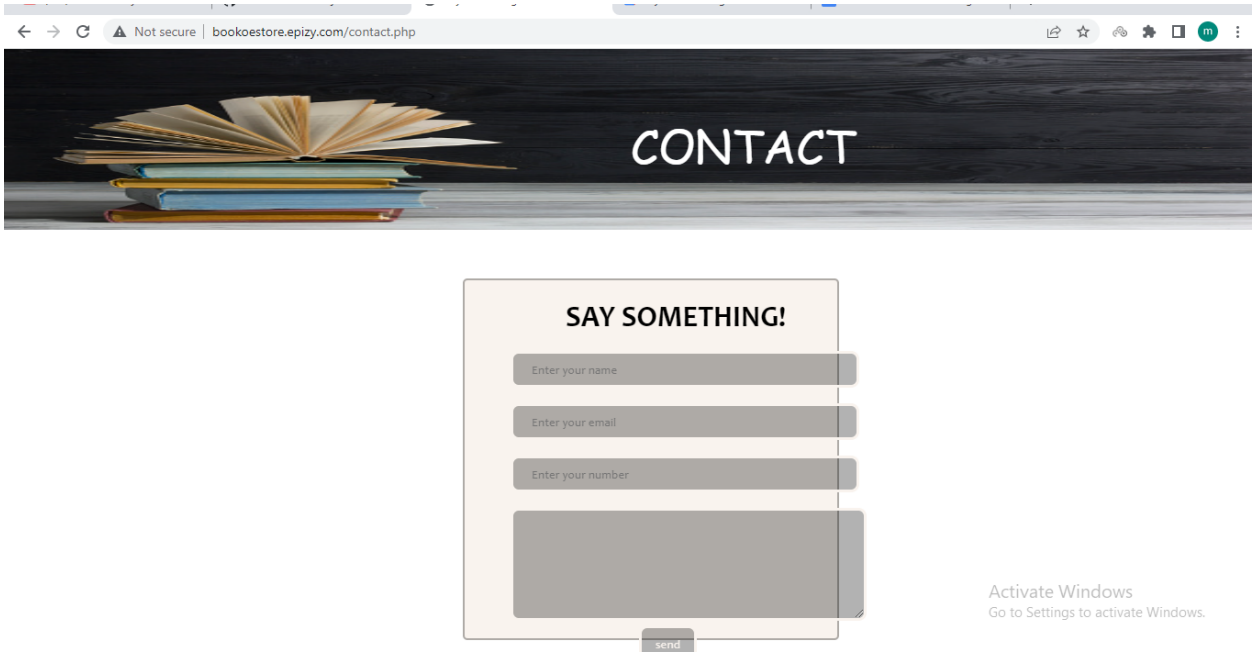


Our Mission: *To help our pepople who interested to read books.*

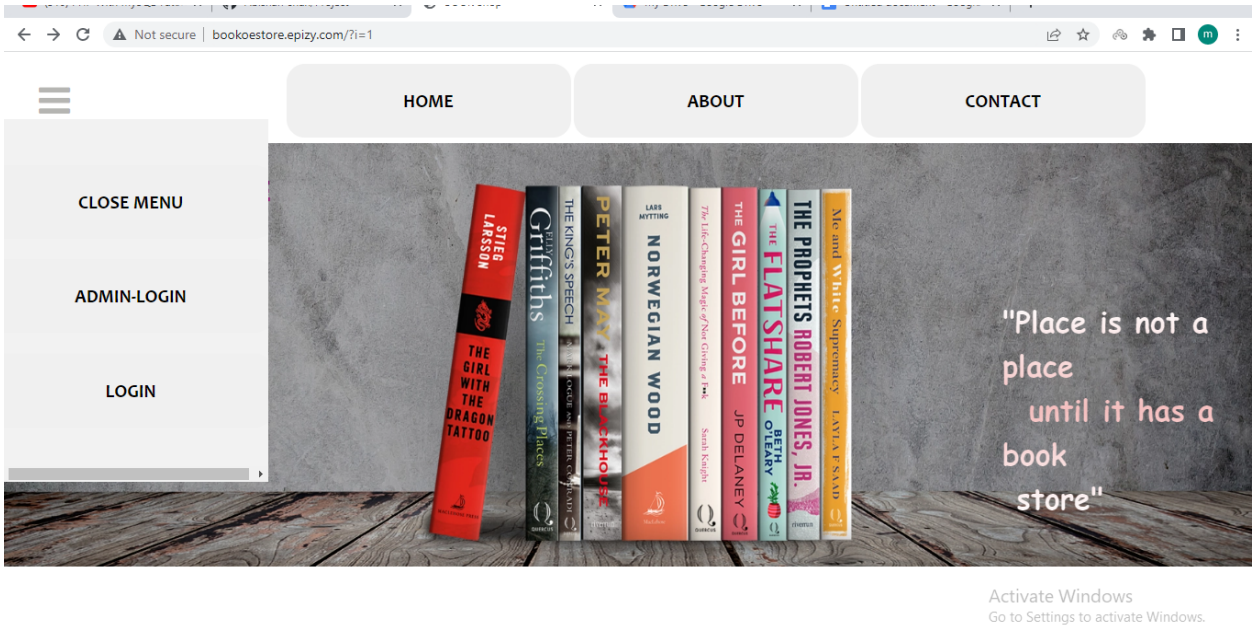
Our Vision: *Our company is a comprehensive online bookstore for both books and other products of every point of knowledge. Our philosophy is based on information,communication and education, which we feel should be balanced out with a daily dose of knowledge*

Activate Windows
Go to Settings to activate Windows.

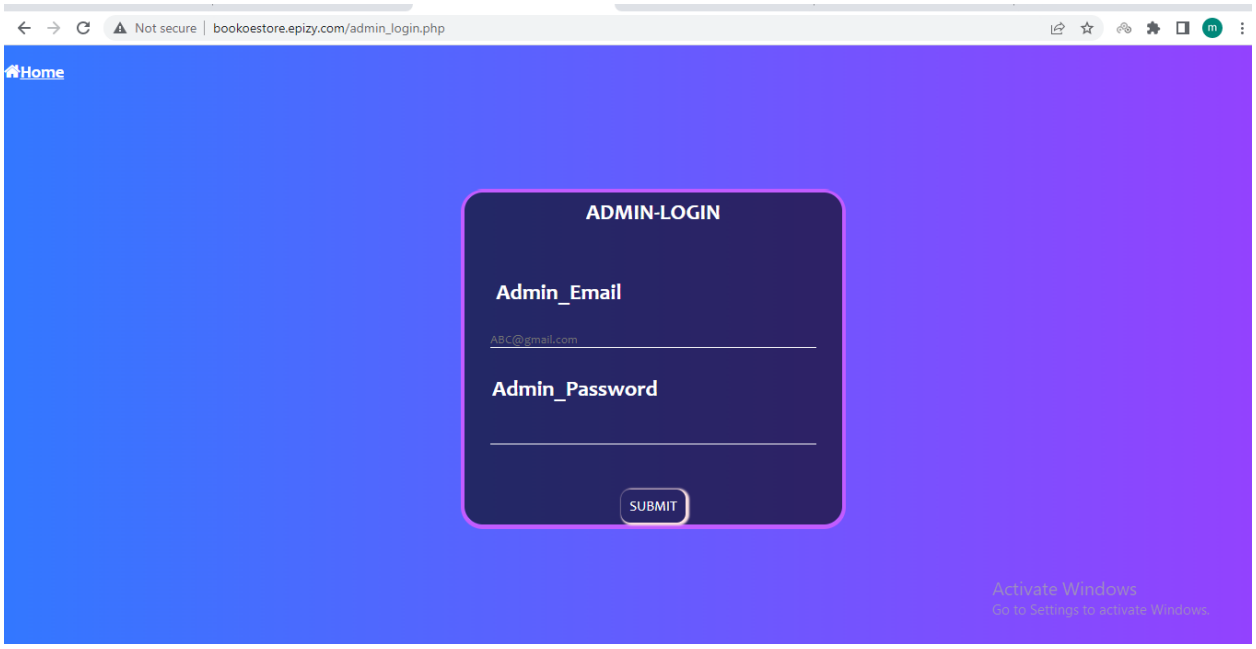
This is the about page.



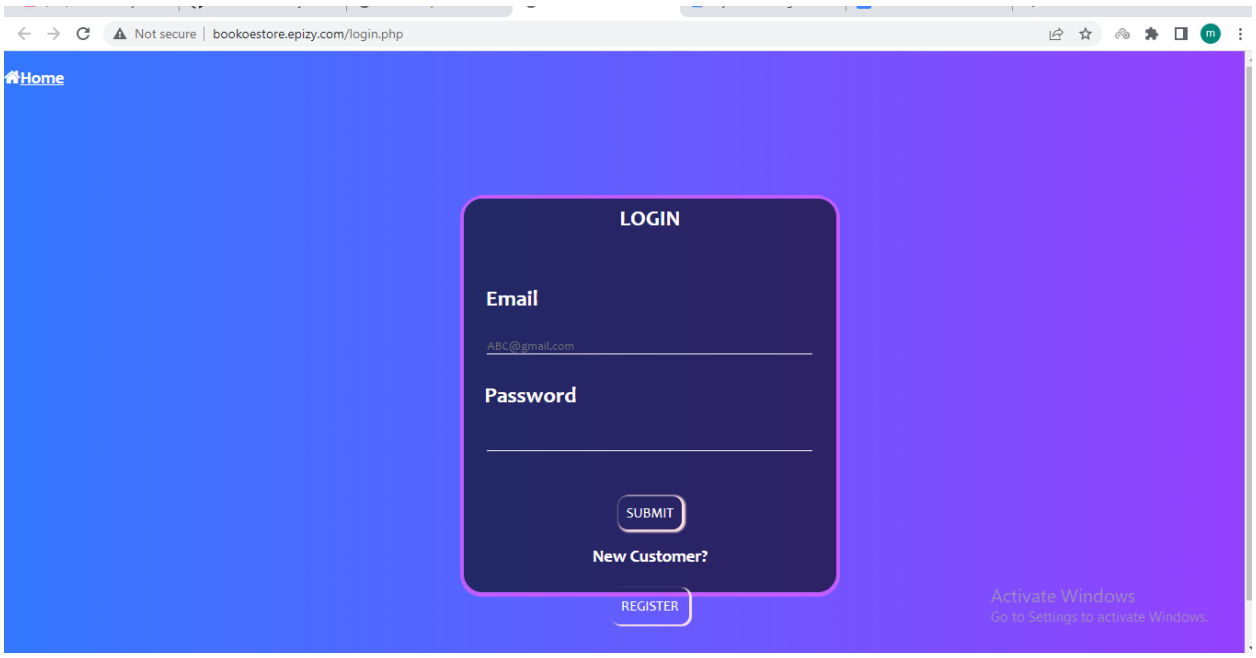
This is the contact page.



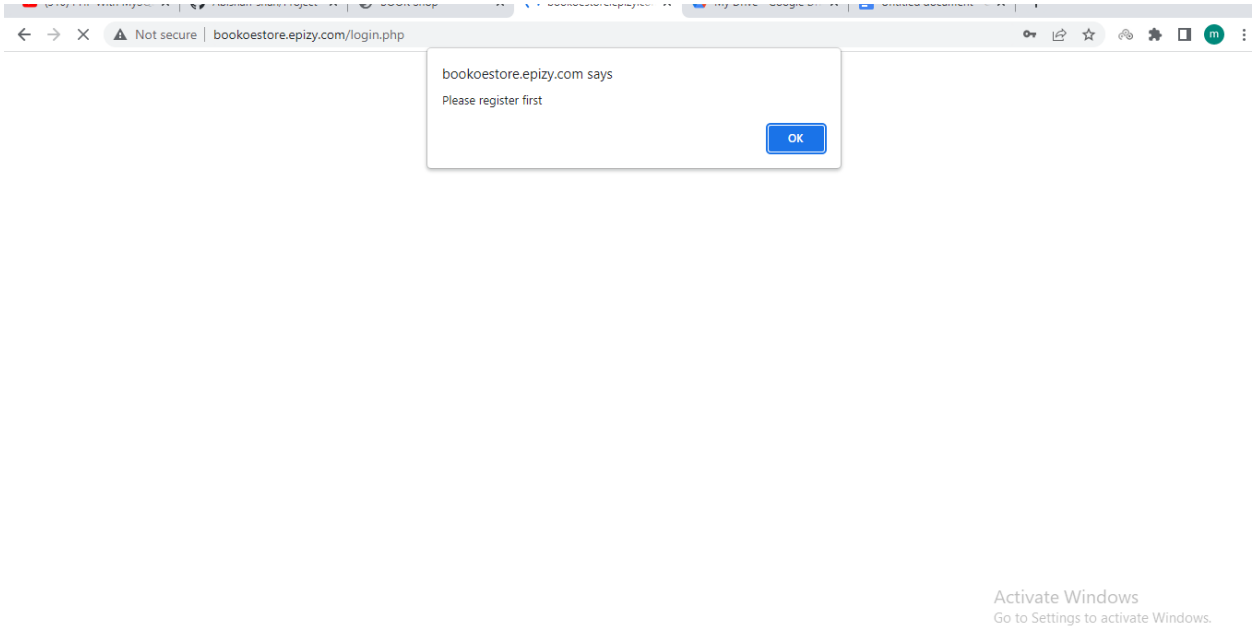
In the menu bar when users scroll down, there are three option to close the menu,login as admin and login as a user.admin can select admin login to enter the web page by giving appropriate passwords.



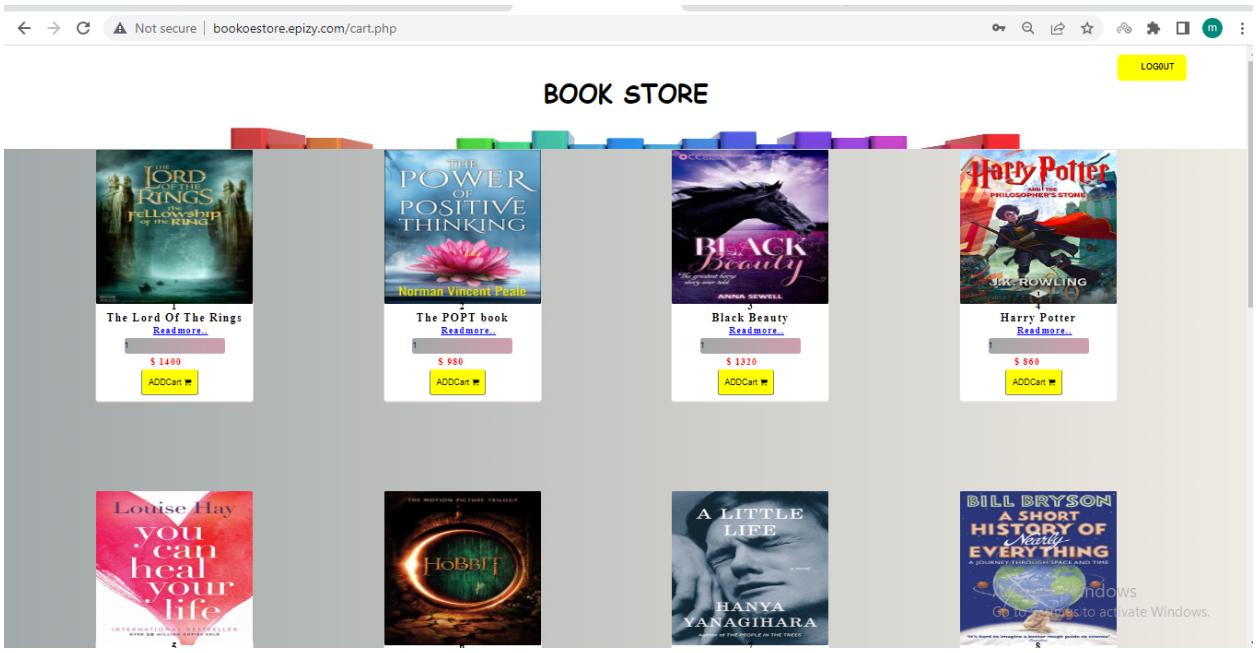
The view of admin-login



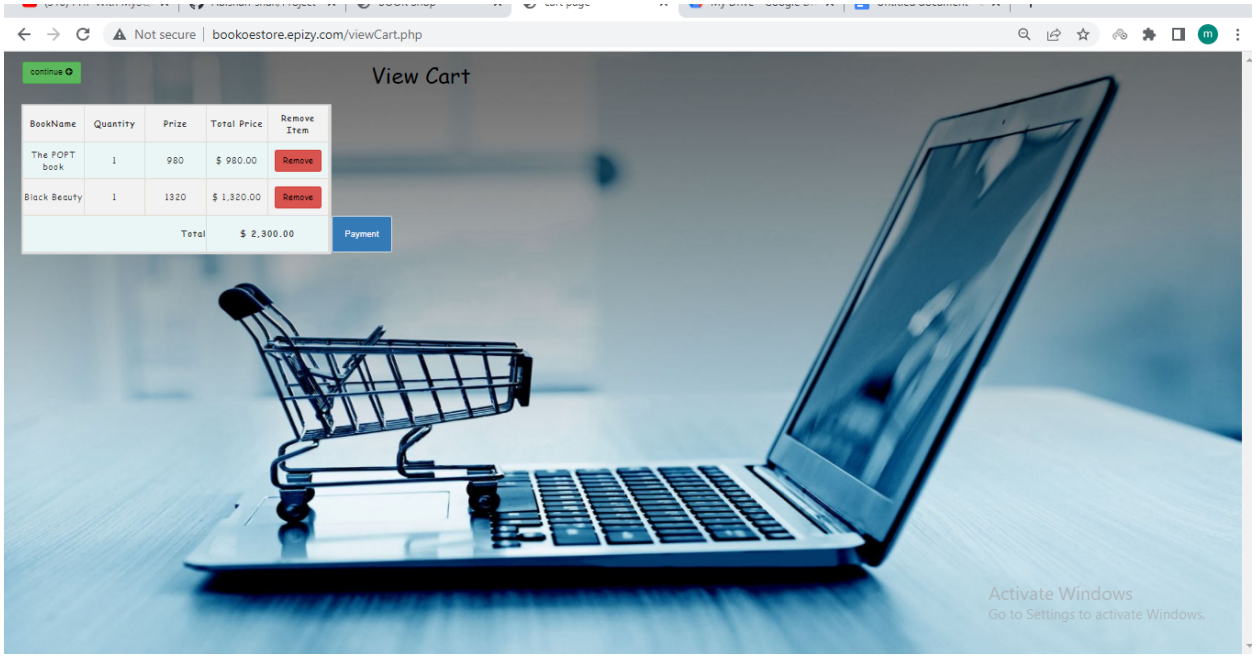
This is the view of user login tab.if the user is new and tried to the enter without register it will prompt the user to register first.



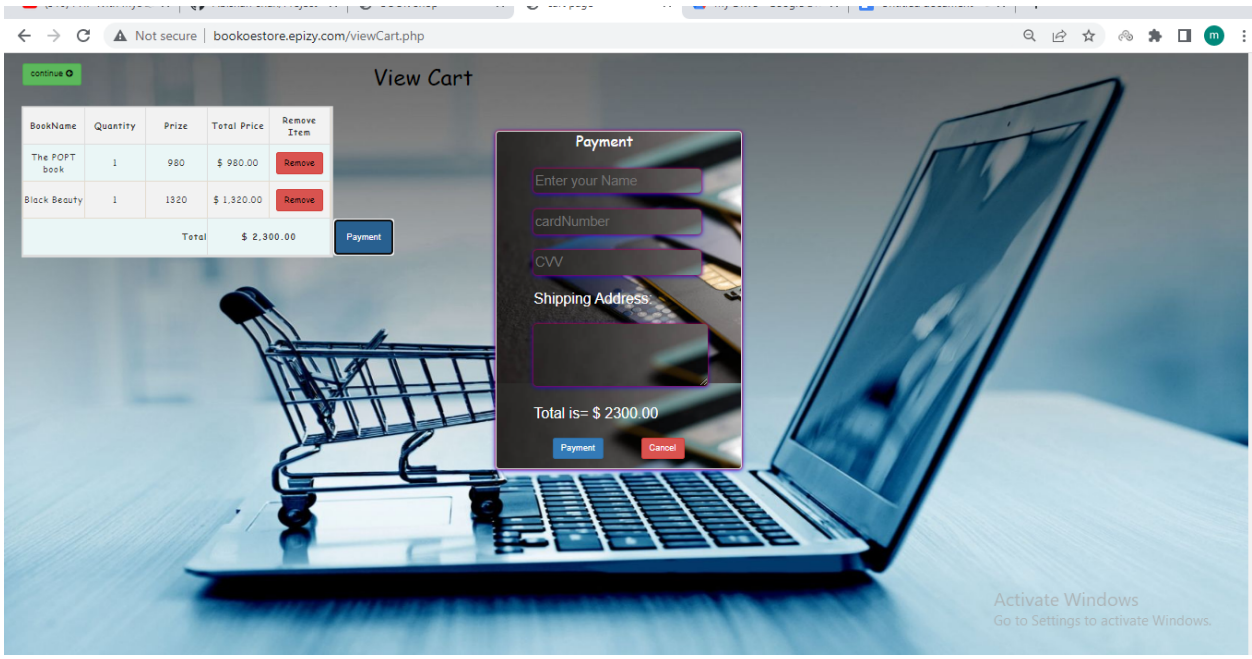
After registering, the user can again login to the system and the view after the login to the page will be like this.



If a user wants to buy the books he/she can select a book and add it to cart and when selecting a book it will redirect to the cart page automatically.



If the user doesn't want to buy a book he/she selected then the user can remove it from the cart page by clicking remove. If the user wants to buy then he/she can buy a book.for to do pay user need to click the payment button.



Payment tab will open on the same page after clicking the payment button then the user can give card details to the system and do the payment and again if the user doesn't want to buy he/she can cancel the payment.

Users can logout from the page by clicking the logout button in the login home page.
